After being in the manufacturing business for my entire career, I was given the opportunity to change to software programming. Thanks to my wife, our life has been better, I can say that I'm on the career I've always dreamed of. As a programmer I'm proud of what I have accomplished so far, yet, I have a lot to make.

CAREER HIGHLIGHTS

- Developed a new employee oriented program calculator in order to output how much money employees would earn once they get discharged of duty.
- *Developed a new web app to help a restaurant get orders on line and sync with a local carrier to deliver the restaurant's food to the final client.*
- *Implemented several local websites.*
